# ED 250

TRACK MOUNTED RC RIG WITH A  
SMALL FOOTPRINT  
RIG FEATURING ONBOARD AIR  
RATED TO 1360 CFM @ 800 PSI

# ED 250

The ED250 has been custom built for Egan Drilling. The Main feature being all equipment is contained onboard the rig including Booster, Sampling System, Dust Suppression and storage for up to 150m of rods. The rig has been designed for clients who are looking for a versatile RC Rig that can be used for grade control or resource definition in and around their mine sites. Track mounting allows access to the most difficult sites.

Smaller pad construction and therefore reduced environmental impact is achieved due to the small footprint design. Auto rod breakout and handling ensures our staff remain safe throughout the drilling operations.

*Compact Design for Tight Pads*

## FEATURES AND SPECIFICATIONS

Carrier	CAT 330 Tracks
Booster	Ariel JGP - 1
Depth Capacity	250M
Sampling	Rotary Cone Splitter
Dust Suppression	Dry Element
Survey Winch	300m
Air Capacity	1360 CFM @800psi
Auto Rod Handler	Austex
Auto Rod Breakout	Austex
Fire Suppression	AFFF
GPS Guidance System	Sitech
Small Carbon Footprint
