Health, Safety and Environment Policy

Egan Drilling is committed to ensuring the health and safety of its employees and minimising harmful impact to the environment. We will promote the health and wellbeing of all employees.

In support of this policy, top management accepts the responsibility for the prevention of incidents and non-conformances, through the identification and elimination of workplace hazards, risk management and the promotion of risk awareness among their employees and contractors.

Egan Drilling will comply with all statutory Acts and Regulations as a minimum standard and will strive to maintain a level of health, safety and environmental risk management that extends well beyond the legal requirements including ISO 45001 - AS/NZS 4801, ISO 14001 and ISO 9001.

To consistently achieve this, the company will;

- Provide and maintain a safe and healthy working environment for all employees and contractors
- Reduce or eliminate health, safety or environmental incidents and non-conformances
- Provide training to all site personnel to assist them in carrying out their work in a manner that minimises health, safety and environmental harm
- Ensure that supervisory personnel understand and accept their responsibility for preventing unwanted harm within their area of control
- Ensure that all employees accept their health, safety and environmental responsibilities and extend this concern to other employees
- Ensure operational equipment and processes is properly designed, maintained and operated in compliance with health safety and environmental requirements
- Investigate incidents and non-conformances thoroughly to prevent their recurrence
- Include environmental, economic and social sustainability into operational planning wherever practicable to maintain and continuously improve the organisation for the future

Egan Drilling encourage employee consultation in matters affecting the health and safety of our people and environmental management of our work areas.

General Manager
Glenn Summerfield
